Logistical information ...

Molly the van

The van and 50meter extension cable we have are both PAT tested but please be aware we may need access to a domestic 240v 13amp power supply.

If a generator is the power source, we require it to cope with 25amp on start-up and a running 12amp usage.

Rosie the van

The van and 30meter extension cable are both PAT tested, it is unlikely we will need power if serving for 4 hours or less but if any longer we would need access to a domestic 240v 13amp power source.

If a generator is to be the power source, we will need it to manage 20amp on start-up and a running 5amp usage.

Kind regards,

Peter Cook
